

# Petition to Prevent Mixed Disaster of Earthquake and Nuclear Power Plant in Japan

To: Prime Minister of JAPAN Mr. Naoto Kan

Minister of Economy, Trade and Industry Mr. Banri Kaieda

Minister of State for Disaster Management, Mr. Ryu Matsumoto

Minister of Education, Culture, Sports, Science and Technology, Mr. Yoshiaki Takaki

Chairman of House of Representatives, Mr. Takahiro Yokomichi

Chairman of House of Councilors, Mr. Takeo Nishioka

Chairman of the Prefectural Governors' Association, Mr. Wataru Aso

Chairman of the Federation of Electric Power Companies, Mr. Masataka Shimizu

We call upon the immediate stop of Hamaoka nuclear power plants. The Great Tokai Earthquake is coming directly below them!

## Petition Request:

In order to prevent Genpatsu-Shinsai (mixed disaster of earthquake and nuclear power plant accident), we call upon the immediate stop of the operation of the nuclear power plants in the area where a great earthquake is predicted to occur directly below.

Name	Address

※ Genpatsu-Shinsai is a disaster where a nuclear power plant has a catastrophic accident triggered by earthquake, and hence, the simultaneous disaster of earthquake and radiation could occur.

※ People of any nationality or age can sign. Please sign with members of your family.

**The deadline of this petition is  
August 1st, 2011 (will be continued)**

Name of the organization

**Address:** Rohdohkaikan, Jichiro office, 11-22, Minami-cho, Shizuoka, 422-8067 Japan, **Tel:** 054-287-7198

**Fax:** 054-280-0235 **http://www.geocities.jp/genpatusinsai** **E-mail:** genpatusinsai@ubcnet.or.jp

# Sign Now to Prevent Genpatsu-Shinsai!

A massive earthquake (Great Tokai Earthquake), greater than magnitude 8 according to the Japanese government report which numerous scholars have been warning is about to occur directly below the Hamaoka nuclear power plants (Chubu Electric Power Co.). In Hamaoka, there are four reactors under operation and one is under test operation.

In spite that nuclear power plants are predicted to hit by the massive earthquake for the first time in history, the government and municipal office and electric company have merely repeating, "They are absolutely safe." There are mounting anxieties among the residents in the area. Once Genpatsu-Shinsai occurs, it will be almost impossible to rescue the victims, and numerous number of lives that had been supposed to be saved cannot be saved.

Not only that, environmental contamination caused by radiation can spread even outside of Japan, threatening foods and lives, and horrendous effects could last among children and their offsprings. We can never know how much impact will be caused economically and socially.

Though we cannot stop the occurrence of an earthquake, we can stop the nuclear power plants. We should not believe in technology too much and we should be humble in front of the natural disaster. Let us request the halt of Hamaoka nuclear power plants to those who are in charge of people's lives and safety. Please cooperate our petition campaign. April 26, 2004 Shizuo Shoji, Association for National Petition Campaign to Prevent Genpatsu-Shinsai

**Bold lines: Predicted earthquake plane**

**Bold lines: map of Japan**

**Map of radiation contamination by Chernobyl Accident**

The center is Chernobyl. With a map of Japan, we can see Tokyo could be devastated by Hamaoka accident.

This petition is aimed for preventing Genpatsu-shinsai by spreading the movement to stop nuclear power plants in the area where a massive earthquake is predicted. It will be forwarded to the government, Diet, municipal offices, electric companies, and media. After the first collection, we plan to submit our petition to the Cabinet office at 14:00 pm on August 30.

In case there were special movements regarding earthquake prediction information, electric companies, and the government, we might change the schedule of our collection deadline. We appreciate your understanding. (Even in that case, we will continue collecting signatures after the deadline.)
